ABSTRACT

In Ho Chi Minh's thought, the issue of caring, fostering and educating the young generation holds an extremely important position. Because youth is the backbone of the nation, the future of the nation. In his Will, Ho Chi Minh once again admonished: "The Party needs to take care of educating them in revolutionary morality, training them to become heirs to build socialism that is both "pink" and at the same time "specializing", nurturing the revolutionary generation for the next generation is a very important and very necessary thing. Especially in the current period, with the process of deep international integration with the rapidly developing science and technology, Vietnamese youth need to cultivate their own revolutionary morality and adapt to the development of the world, having a breakthrough thinking, firmly overcoming all difficulties, always worthy of their position and role, with enthusiasm, energy, strong will to rise, living in a harmonious environment. Peace, renewal and development of the country, Vietnamese youth will definitely uphold the pioneering spirit, bravery, solidarity and creativity, contributing to the construction and development of an increasingly prosperous and happy country.

Keywords: Construction, development, youth, testament, Ho Chi Minh

Make a problem

Taking care of, fostering and training young people according to Ho Chi Minh's thought in the period of industrialization and modernization and the period of world economic integration is a matter of great concern to the Vietnamese government. Since then, contributing to the training and education of young people who

are both "pink" and "specialized", the future owners of the country firmly moving forward with advanced countries in the world.

The youth of the country is a large force, and at the same time the main labor force of the society, playing an important role in the cause of building and defending the socialist Vietnamese Fatherland. Ho Chi Minh emphasized:

Building and developing a team of Vietnamese youth according to Ho Chi Minh's will. *International Journal of Multidisciplinary: Applied Business and Education Research*. 3 (1), 111 – 116. doi: [10.11594/ijmaber.03.01.13](http://dx.doi.org/10.11594/ijmaber.03.01.13)

"Youth are the future owners of the country. Indeed, prosperity or decline, strength or weakness of the country all come from youth" [1, p. 185]. In his Will, Ho Chi Minh warned: The Party must have a plan to train them to become the successors of the revolutionary career both pink and professional, fostering revolutionary generations for the next life is the most important job. Importantly, absolutely necessary, Vietnam is increasingly integrating deeply in all fields with the world, the social structure is also in the process of progress and change, the rich-poor divide, complex social stratification. The complex is affecting young people in terms of consciousness, psychology, morality, lifestyle... Therefore, taking care of, fostering and training young people according to Ho Chi Minh's thought is a very necessary job.

Ho Chi Minh's thought on building and developing the youth team

Ho Chi Minh is the spiritual leader of the Vietnamese people. Throughout his life, Ho Chi Minh always for national independence, happiness for the people, loved all classes of people. In particular, Ho Chi Minh has given special favor to the young generation - the future owners of the country. Ho Chi Minh affirmed: "A year begins in the spring. A young life begins. Youth is the spring of society" (Ho Chi Minh, 2011, volume 4, p. 194), youth is like spring: fresh, full of life energy. Ho Chi Minh wants to remind young people to have full courage and enthusiasm, dare to dream and turn dreams into reality.

The care, education and training of young people is the work that Ho Chi Minh does all his life tirelessly. On the 20th anniversary of the August Revolution, Ho Chi Minh sent a letter to the youth, in which Ho Chi Minh wrote: "You must always uphold the revolutionary spirit, be loyal to the country, be filial to the people, and well fulfill the duties of himself, every challenge is completed, every difficulty is defeated the enemy, is not afraid of hardships, sacrifices, enthusiastically emulation, increased production, bravely fought, volunteered to take the lead in the cause of anti-American save the country" (Ho Chi Minh, 2011, volume 14, p. 618).

Ho Chi Minh clearly stated the role of young people: "Youth are the energizer of the revolution for the old generation, and at the same time the mentor and guide of the future generation of young people" (Ho Chi Minh, 2011, volume 10, p. 433-434). Ho Chi Minh taught young people to live with goals, ideals, with high will and determination, perseverance, overcoming hardships and difficulties to achieve that ideal goal: Nothing is difficult /Just afraid of not durable / Digging mountains and filling the sea / Ready to work.

For students, Ho Chi Minh also gave words of encouragement and kindness: The country expects a lot from you. Whether the country-side of Vietnam becomes beautiful or not, whether the Vietnamese people climb to the top of glory to compete with the great powers of the five continents, is largely thanks to the children's education. Ho Chi Minh put his faith in the powerful youth force and affirmed: With a generation of enthusiastic and resilient young people, they will definitely succeed in the cause of defending the North, liberating the South, and reunifying the country. According to Ho Chi Minh, the fate of the nation, the nation, prosperity or decline, weakness or strength, largely depends on the youth - who are responsible for carrying out the glorious historical mission handed down by generations of his father. Therefore, the youth must definitely become a great and solid force; must be the ones who not only shoulder but also overcome the things that the previous generation wanted but have not been able to do due to limitations and historical conditions... Ho Chi Minh's comments and assessments serve as a reminder in the youth class about faith, intelligence and creativity for a new society of the nation.

In his Will, President Ho Chi Minh spent a part talking about the role of youth and youth work. Ho Chi Minh has given the young Vietnamese generation a considerate education, deep love and special attention. Ho Chi Minh assessed: Our country's youth union members are generally good, aggressive in everything, not afraid of difficulties, have the will to progress. At the same time, Ho Chi Minh advised: The Communist Party of Vietnam needs to take care of educating them in revolutionary moral-

ity, training them to become heirs to build socialism both "pink" and "specialized". "Therefore, fostering the revolutionary generation for the next generation is a very important and very necessary thing.

Over the past 50 years, the strong vitality of the Will is still there, the Vietnamese people in general, and the young generation in particular, are more and more imbued with the profound teachings and thought of Ho Chi Minh. The Vietnamese people have been and will always engrave valuable lessons in their hearts, constantly strive to practice virtue and talent, sow in the hearts of every young person a dream: If you can make seeds, choose the next season. / If history chooses us as a fulcrum / What can be more fun than being a soldier at the forefront / In the dark night, my heart is a fire (To Huu, Hello spring 67). Good implementation of Ho Chi Minh's Will, the young generation of Vietnam will be a shining torch to light the way to find the truth to: The homeland of Vietnam becomes beautiful ... the Vietnamese people step up to the glory station together with the great powers of the five continents.

The Vietnamese State applies Ho Chi Minh's thought in building and developing the youth team

Over 50 years of implementing Ho Chi Minh's will, the State of Vietnam has paid great attention to the work, education, care and training of the young generation in a relationship that is both "pink" and "specialist"; both have moral qualities, a clean and simple lifestyle according to the criteria of a communist soldier "necessity, thrift, integrity, righteousness, justice and impartiality", sacrificing his whole life to fight for the Communist Party of Vietnam for the revolution, mature in thinking, acting, solving problems intelligently, flexibly, flexibly, and highly professional in terms of politics, culture, science and technology and military".

The Communist Party of Vietnam has had many resolutions and policies on youth work and youth education that have been implemented and achieved good results, typically: Resolution No. 25-NQ/TW of the Committee Executive Committee of the Communist Party

of Vietnam, term X on strengthening the leadership of the Communist Party of Vietnam with youth work in the period of accelerating industrialization and modernization, emphasizing the importance of youth work. Youth is the mainstay of the country, the future owner of the country, the shock force in the construction and defense of the Fatherland, one of the factors determining the success or failure of the cause of industrialization. , modernizing the country, international integration and building socialism. Youth is placed at the center of the strategy of fostering and promoting human factors and resources. Taking care of and developing young people is both a goal and a driving force to ensure stability and sustainable development of the country"; and "youth work is a matter of survival of the nation" (The Central Committee of the Communist Party of Vietnam, 2008). This is the direction and task for the Communist Party of Vietnam, the State and the whole society to take care and develop young people in the period of accelerating industrialization and modernization of the country and international integration.

On May 15, 2016, the Politburo (term XII) issued Directive No. 05-CT/TW on continuing to promote studying and following Ho Chi Minh's moral example, one of the main contents of the Decision No. essential of only the click on the education bar, that is: "For high school students, vocational training, professional secondary school students, learning about Ho Chi Minh's morality and style associated with civic education and professional ethics Karma. For university and college students, there are lectures and topics on Ho Chi Minh's thought. For university students majoring in political theory, students of politics, mass organizations and the armed forces need to build a system of lectures and seminars to study Ho Chi Minh's thought " (Politburo, 2016). Or the Secretariat of the Central Committee of the Communist Party of Vietnam Directive No. 42 / CT-TW on strengthening the leadership of the Communist Party of Vietnam in education for revolutionary ideals, morality, and cultural life. For the young generation in the period 2015-2030; Legal system, state management company on youth are more and more perfect.

To fulfill President Ho Chi Minh's wish, in the face of important events, equipment and State expectations, today's youth are well aware of their roles and responsibilities in order to constantly study, cultivate and forge practice bravery and courage to overcome all difficulties and challenges. Young people must have comprehensive courage to self-manage and successfully complete all assigned tasks.

Young people today, happier and more proud to live, work and study in peace and warmth. Therefore, today's youth class has many learning opportunities to have academic and professional problems. Those benefits are the luggage to help young people firmly participate in all activities with the spirit of youthful enthusiasm, the spirit of readiness and friendliness "you can have whatever you need, what is difficult for young people to do" and gradually increase their determination. In general, the young generation of Vietnam is interested in establishing and educating better and better, most young people believe in the leadership of the Communist Party of Vietnam, the development of the country, and live responsibly. family and himself, having dreams, ambitions, active thinking, confidence, marking, working desk, making many important contributions to the construction and defense of the socialist Fatherland.

In the current conditions, due to the influence of the negative aspects of the market economy, the information explosion period, the 4.0 technology era, due to lack of bravery and not seriousness in training and striving, a part of young people have lived without ideals, living loosely, being lazy to study, cultivate morality, live without ideals, have no faith, have no right orientation, some even violate them. Therefore, the implementation of the Ho Chi Minh Heritage needs to focus on completing the overall tasks and solutions along with the efforts of the whole political system and the youth themselves to well implement the strategy of "growing people" to effectively foster the revolutionary generation for the next generation; ensure building a contingent of talented and virtuous successors, well fulfilling the important tasks assigned by the Fatherland and the people.

Under the leadership of the Communist Party of Vietnam, the Communist Party of Vietnam and the attention of the State of Vietnam, the youth have played a pivotal role in all economic, cultural and social fields, contributing to important to the development of society. Typical are the movements: "Youth to set up a business", "Youth to defend the Fatherland", "Youth volunteers to build and defend the Fatherland". In particular, the 11th National Youth Union Congress (term of 2017 - 2022) launched 3 major movements: "Youth Volunteer Movement", "Creative Youth" and "Youth Movement around the World". Activation to defend the Fatherland" with 3 programs of companionship and support: Program to accompany young people in learning, scientific research, mastering technology; The program to accompany young people to start a business, the program to accompany young people to develop social skills, improve physical, cultural and spiritual life has been positively responded to by young people from all walks of life. The spirit of "starting a business" with young people and young entrepreneurs as the core has been positive throughout the country and initially achieved encouraging results, in which there are advanced young people, leading in many fields, with high political attitudes, awareness and consciousness, and the will to rise up. Young people need to overcome difficulties, rise up to establish themselves, establish a business, and strongly promote the nation's tradition.

At the 6th Congress of Advanced Youth who follow Ho Chi Minh's word, 401 typical individuals who are advanced in studying and following Ho Chi Minh's ideology, morality and style in the 2018-2020 period took place. in the two provinces of Nghe An and Ha Tinh on May 30 and 31 were typical union members and youth; They are typical examples in studying and following Ho Chi Minh's thought, morality and style, making worthy contributions to Youth Union work and the youth movement, having prestige and positive influence in the community. Create a spillover effect and have a positive influence on children across the country. Ho Chi Minh's ideology, morality and style have become the reason of life of millions of Vietnamese union members, youth and young generations.

However, in addition to the great achievements that young people have contributed to the country, at present, a part of young people still has limitations, many young people are still confused and vaguely aware of the conspiracy, tricks of hostile forces for the Vietnamese revolution. More worryingly, there are still young people who have not been actively studying and practicing, not participating in activities of mass organizations and social organizations, showing signs of ideological deterioration and having a bad lifestyle, causing serious consequences for themselves, their families and society. This is a big issue that needs attention, there are solutions to minimize limitations, further promote the impulsive role of youth, better and better meet the requirements of the new era.

Some recommendations to improve the efficiency of youth building and development

Educating revolutionary ideals, morality, lifestyle and culture for the young generation

Implement synchronously, well implement the motto of education through practical action, set examples of advanced individuals, exemplary youth union members, promote the role of self-education and self-training of each student and youth in the organization and operation environment of the Union.

Educating on patriotic and revolutionary traditions through practical activities and youth movements... Thereby, helping young people to have the right attitude in assessing and perceiving the good traditional values of Vietnamese ethnic. Integrate propaganda on studying according to Ho Chi Minh's morality and style skillfully, avoiding dryness; from there, attracting a large number of members to participate".

Strengthening activities of Youth Union organization

The Ho Chi Minh Communist Youth Union needs to be proactive in creating and renovating the contents and educational methods of the Youth Union through educational activities, action movements, patriotic emulation movements to create an environment for the young generation to practice and grow up,

contributing to the formation of a noble and beautiful revolutionary moral ideal, a benevolent lifestyle, and abiding by the law.

Calling, awakening, enlightening young people and encouraging them to participate in all activities; focus on training, fostering, being ready to assign tasks and create conditions for them to study, work, and dedicate... Focusing on youth, bringing them to revolution, organization, education, and world training youth system so that they can promote their roles and contribute to the common victory of the revolutionary cause.

Promoting the role of social networks

Social networks make an important contribution to the young generation in propagating, educating and following Ho Chi Minh's example. Thereby, helping the organization of the Youth Union to be convenient in grasping the ideas, trends, interests and needs that the union members and young people are interested in. At the same time, mobilizing youth energy, with respect for Ho Chi Minh, resolutely fighting and erasing bad information... This also helps to train political and revolutionary bravery for youth union members. When young people complete their missions, become virtuous and talented people who can shoulder the responsibilities entrusted to them by the revolution, and take ownership of the future in a worthy way, each young person must always self-consciously train their spirit, must actively work to prepare for the future. Every young person needs:

Firstly, in life, one must always be exemplary in observing all guidelines and guidelines of the Communist Party of Vietnam, policies and laws of the State. Practice thrift, fight waste, live peacefully with everyone, love everyone, and help everyone make progress.

Second, the common interests of society and the nation must always be placed above their own interests and personal interests. Must always have a firm stance and ideology, must participate in building a cultural family and a cultural lifestyle in residential areas.

Third, in work, we must always try to fulfill our duties and responsibilities that the agency entrusts. Always self-study and self-forge to improve professional qualifications to meet the

cause of industrialization and modernization of the country.

Fourth, Must be exemplary, practice thrift in work and in teaching. Always raise a sense of self-criticism and criticism. Must be straightforward, honest in work as well as dealing with people.

A very important issue is to pay attention to moral education for young people so that the younger generation can continue the ideal and path that his father's class has chosen. This is difficult, complex, long and important work. Along with the requirement that young people train themselves and cultivate their own morality and lifestyle, it is very important for today's young generation to engage in reality. Therefore, each cadre, party member and previous generations must not only impart experience, knowledge, theory and practice, but also set an example in all fields of work and in life for.

Conclusion

Thus, the care, fostering and training of young people according to Ho Chi Minh's thought is a very necessary job, creating confidence for the young generation in the Communist Party of Vietnam and the country. Youth is a class of healthy young people who are enthusiastic about the revolution, sensitive to new things and progress, and build trust with young people, then youth will promote their full abilities and role in self-study, self-training, self-cultivation of morality and lifestyle. That is an important solution to help young people quickly progress and mature, which is also a decisive condition and training results of young people. Taking care, fostering and training is also creating for young people the need, motivation to strive, train properly, making them have a sense of ownership, eager to learn, seek

progress, rise to self-affirmation. Create all favorable conditions for young people to strive for training, and at the same time must regularly monitor, test and evaluate results, orient their efforts to young people, pay attention to meet the legitimate needs of young people, create good conditions for young people to practice morality and lifestyle. Well implemented a number of solutions to care, foster and train young people in the period of industrialization and modernization of the world economy is to contribute to the training of the young generation that is both "pink" and specialize". Help them become the future owners of the country, firmly step forward together with the progressive nations in the world, worthy of Ho Chi Minh's wish.
